Simple, standardised positioning
speeds up both frequent and infrequent
examinations – and thus alleviates time
pressure.

Comfortably positioned patients
undergo examinations **calmly** and
satisfied without complications.

Improved image quality and fewer
motion artifacts thanks to effective
immobilization.

Durable

For a high patient throughput and tricky patient transfers.

Perfectly Hygienic

Designed for regular wipe disinfection even with 90% alcohol.

High-quality

High-frequency welded seams are built to last.

Swiss Quality

Designed and manufactured in Switzerland.

For radiology

Tested for MR safety and radiolucency.

ISO-certified

Medical device class 1 according to ISO 13485.

We opted to work with Pearl Technology in sourcing our positioning aids as a flexible alternative across our MRI locations. The products are **good quality**, with patients finding them **comfortable**, as well as helping us further support patient safety. Our staff also love working with them as they are easy to **clean** and **durable**.

Dr. Darren Hudson,
MRI Clinical Lead at InHealth

BabyFix

The BabyFix creates ideal conditions for a safe and careful examination procedure for newborn babies in MRI and CT. The positioning aid is wrapped around the newborn and then vacuum-sealed. This hardens the Babyfix to a cast form and enables pressure point-free and stable positioning. This allows to avoid sedation, using the feed-and-sleep method.

BabyFix Cocoon

Art. 1107

Positioning aid for the immobilization of newborn babies (2–5kg) in MRI and CT.

Dimensions: 75 x 40 cm

BabyFix XL

Art. 1276

Positioning aid for immobilization of infants (5-9 kg) in MRI and CT.

Dimensions: 110 x 80 cm

Hand Vacuum Pump

Art. buw-5355

Hand Vacuum-Pump is MR-compatible and can be used to withdraw air from vacuum cushions.

Case study

CRANIA

The CRANIA products have been developed specifically for head scans and promise optimal patient positioning for head measurements in MRI.

The CRANIA is inflated using a hand pump and the head is comfortably fixed within the coil. The arrangement of the pearl chambers enables the suppression of head movements in all three axes.

CRANIA Adult

Art. 1001

The CRANIA Adult is specifically suitable for research oriented head exams, such as fMRI/EEG.

CRANIA Child

Art. 1004

The CRANIA Child is specifically suitable for pediatric head exams with children older than 3 years.

CT Gantry Cover

The CT Gantry Covers are protective covers made of PU foil, which are attached to the gantry with hook-and-loop patches to protect CTs from liquids.

CT HeadFix

The CT HeadFix offers an integrated, quick and hygienic solution for head fixation in the CT.

The side wings are inflated by means of a hand pump and the head is thus held in a stable position. The CT HeadFix is compatible with the head holders of all major manufacturers.

CT HeadFix

Art. 1105

Inflatable immobilization aid for head fixation in CT head holder.

Tip: works best with the ProBelt 50 VL/VH, the blue strap seen on the next page. For more information, see page 25.

CT Table Cover

The CT Table Covers are protective sleeves made of PU foil and are available for CT table covers from various manufacturers. The specially designed flaps provide additional safety and the high-quality materials and workmanship make the product hard-wearing and durable.

FoamFit

The FoamFit positioning aids are made of a soft foam and are welded into a durable PU foil. Their flexibility and adaptability make them particularly suitable for use inside the coil, where they provide optimal support between the patient and the coil.

FoamFit Plate

MR Safety Pad

The MR Safety Pad positioning aids are made of a dimensionally stable foam material and are welded into a durable PU foil. The thin foam plate prevents direct patient contact with the gantry and thus reduces the risk of burns.

ProFoam Plate 50x25x1 DSR

Art. 1247

The ProFoam Plate is used to prevent skin-to-skin contact and thus reduces the risk of burns.

Dimensions: 50 x 25 x 1 cm

ProFoam Plate 100x25x1 DSR

Art. 1248

The ProFoam Plate prevents direct patient contact with the gantry and thus reduces the risk of burns.

Dimensions: 100 x 25 x 1 cm

ProFoam MR Safety Angel Pad

Art. 1301

The two connected wings on the sides prevent direct contact with the gantry. The MR Safety Pad Angel can be placed under the table mat and thus remains in position.

MULTIPAD Product Family

The universally applicable MULTIPAD product family enables optimum patient positioning for all examinations with head and extremity coils.

The MULTIPAD is inflated using a hand pump, thus the patient is comfortably fixed within the coil.

MULTIPAD Standard

Art. 1012

MULTIPAD Standard

Dimensions: 17 x 6 cm, Variable Thickness: 2 – 5 cm

MULTIPAD Plus

Art. 1022

MULTIPAD Plus

Dimensions: 17 x 11 cm, Variable Thickness: 2 – 5 cm

The MULTIPAD Plus is particularly suitable to fill larger gaps.

MULTIPAD Slim

Art. 1071

MULTIPAD Slim

Dimensions: 17 x 9 cm, Variable Thickness: 1 – 3 cm

The MULTIPAD Slim is particularly suitable for situations where space is limited.

MULTIPAD Ear

Art. 1104

Dimensions: 17 x 10 cm, Variable Thickness: 1 – 4 cm

The MULTIPAD Ear is perfect for immobilizing the patient's head during MRI scans when using in-ear headphones or earplugs.

MULTIPAD Bendy

Art. 1108

Dimensions: 23 x 9 cm, Variable Thickness: 1 – 4 cm

The MULTIPAD Bendy is perfectly suited for a wide variety of joint examinations, particularly those involving flex coils.

MULTIPAD Research Kit

Art. 5004

Components:

MULTIPAD Ear, Bendy and Slim, MULTIPAD Cover.

Application tip:

Use Cover MULTIPAD (sanitary single-use) for improved protection and patient comfort (see Accessories, page 33).

PearlFit

PearlFit positioning aids are initially soft and flexible, but become firm and stable under body weight. Like a beanbag, they therefore minimize pressure points and allow comfortable positioning of the patient. They can be used for all radiological examinations inside and outside the examination area.

PearlFit Cushion

30 x 20 x 4 cm
50 x 20 x 4 cm
50 x 30 x 7 cm

Art. 1138
Art. 1132

PearlFit Roll

Ø = 18, L = 50 cm

Art. 1113

PearlFit Flex 3

Art. 1119

The PearlFit Flex 3, with a size of 90x50x7 cm can be used as either a cushion, a wedge or roll and can therefore be used for a broad range of examinations.

PearlFit Head/Neck

Art. 1121

The PearlFit Head/Neck is used to support the patient's head when lying in supine position.

PearlFit Forehead

Art. 5005

The PearlFit Forehead consists of two components and is used to support the patient's head in prone position.
